Wooded rural landscapes in Central and Eastern Europe: biodiversity, cultural legacy and conservation

20-22 September: UR campus and Kalwaria Pałacowska, SE Poland (field trip)

23-25 September: Bukk National Park and Eger, Hungary (optional)

Thematic scope:

Partners:

- Wooded pastures and silvo-pastoral woods: their status in contemporary Europe (abundance and geographic distribution, syntaxonomic status, conservation); ecology (including ecological history, paleoecology, processes and factors); their biodiversity; how they will fare under climate change
- Local and traditional knowledge connected to wooded rural landscapes: gathering and using the wisdom of farmers, herders, conservationists or others
- Wooded landscapes in contemporary land use economy and policies: what does modern farming and forestry, tourism and recreation, nature conservation, landscape architecture and spatial planning need from these systems.
- Towards future sustainable social-ecological systems: assessment of ecosystem services in the region, the cultural heritage: threats and opportunities in eco-development.

Guest speakers:

F.W.M. Vera (Netherlands), Z. Molnár (Hungary),
P. Szabó (Hungary), K. Kirby (UK)

Patronage:

Rector
UR

President
of Rzeszów

Marshal of Podkarpackie
Voivodship

Minister of Agriculture
and Rural Development
